SAM RIMELL
PRIMARY EXAMINER

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 5 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Baisley (U.S. Patent 6,502,112).

Claim 1: Baisley discloses a method which involves the sorting of two document. The content of each document is readable as a list, given that the claims do not define what the list actually contains. A processing system compares each of the documents, with comparison involving a sorting steps 22 or 26 performed on each document.

The documents are not sortable in their default format by reason that they must be parsed at steps 21 and 25. Therefore, the data retrieval method is a specific data retrieval method that involves parsing the documents from their default format in to a secondary format (in this case, a semantical graph). Following the specific data retrieval method of receiving and parsing the document, the content of the parsed document is then sorted at steps 22 or 26.

The step of calling a generic data retrieval method if the data items are sortable in their default format is recited as a conditional step, and is thus not necessarily limiting the claim.

Claim 2: The specific data retrieval method involves parsing the default documents 20 and 24 into a secondary format (a semantical graph) which permits the document to be sorted at steps 22 and 26.

Claim 5: Since the generic data retrieval method is recited as conditional, it is not necessarily limiting of the invention. Claim 5, like claim 1, asserts that the generic data retrieval method is conditional and not mandatory.

Claim 7: The sort/reorder functions 22 and 26 requests the data items in their sortable format, which is the parsed format, and is different from their original unparsed format.

Claims 3, 4, 6, 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10-24

sl Claims 10-22 are allowed.

Remarks

Applicant's arguments have been considered.

Applicant argues that the Baisley reference does not make any distinctions between sortability and non-sortability of data. Examiner maintains that due to the usage of conditional limitations in claim 1, there is no requirement that the prior art illustrate a system that draws a distinction between sortable and non-sortable data.

Examiner finding is based upon the logic of the steps defined in claim 1.

Both of the calling steps in claim 1 are prefaced by an "if" clause. In other words, the step does not occur unless the condition in the "if" clause is met. Since it is possible to perform the complete method by invoking only one of the two "if" clauses, the broadest interpretation of the claim is that it is limited to only one of the two clauses. The claim is not limited to both clauses, since both clauses do not have to be invoked. In fact, the clauses cannot both be invoked because they are opposite to one another.

Given that the Examiner may make the broadest reasonable interpretation of the claim, Examiner's interpretation is that the claim only requires one of the two "if" clauses to be invoked. Since the Baisley reference meets the requirements for one of the two "if" clauses, it meets the broadest reasonable interpretation of claim 1.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
